why Forester?

Symmetrical All-Wheel Drive

Our All-Wheel Drive philosophy

Greater balance and control. That’s the confidence you get from our unique Symmetrical All-Wheel Drive system, which delivers the drive distribution to all four wheels, all the time. Every Subaru Forester has an innate sense of balance from the ground up, leading to a near perfect symmetrical layout.

Boxing clever

Our famous Subaru boxer engine

While most engines stand vertically, ours lay flat. The famous Subaru boxer engine delivers handling like no other engine can. Sitting horizontally in the engine bay, it moves as a boxer’s fist with a punch and counterpunch action. Lightweight, low and flat, it makes for perfect balance and a much lower centre of gravity. It creates less noise and vibration too. All of this means better on-road handling for you. More stability. More performance. More fun. And a more confident drive.

DataDotDNA®

Every Subaru is fitted with advanced engine immobilisers and the DataDotDNA™ Theft Deterrent System. Microscopic dots are laser-etched with each vehicle’s unique Vehicle Identification Number – making it a less attractive target for thieves.

Three Year Rebate on Theft Insurance Excess

DataDotDNA Technology (Australia) Pty Ltd will pay your theft insurance excess (up to a maximum of $800 including GST) should your new Subaru be stolen and not recovered within 45 days despite the presence of DataDotDNA® and warning labels.

Finest safety

5 star ANCAP safety across the range

With spirit, quality and imagination comes some serious safety innovation. We want every Subaru to be amongst the safest cars on the road. Engineered full of cutting-edge technologies and the most intelligent design features. It’s not a Subaru unless it carries the maximum 5 star ANCAP® safety rating.

Eyes in the back of your head

Rear view reverse camera

Backing along a tight side street? Family driveway fitted with toys? Reverse with confidence, thanks to our near view reverse camera technology. The rear view reverse camera is like having eyes in the back of your head. This greatly improves your visibility and reduces the risk of bumps and scrapes. A rear view reverse camera is standard on every Forester variant.

Excellent fuel efficiency

Subaru makes for better adventures and a healthier planet

With every year that passes, we can do more and more for the environment. Our 2.0-litre turbocharged boxer diesel engine offers frugal fuel consumption, without sacrificing performance. It’s perfect for taking the road less travelled. Subaru diesel – available in Forester 2.0D-L and 2.0D-S variants.

Yet another world first

Lineartronic™ CVT

Pushing innovation beyond the bounds, we introduced an automatic transmission called Lineartronic™ CVT (Continuously Variable Transmission). And it’s the reason our world’s first longitudinally mounted system – for a truly thrilling drive.

Yet another world first

EyeSight® Driver Assist

We’re looking out for you

We’re constantly thinking of ways to help the environment and become more fuel efficient. That’s why we developed Auto Stop Start technology. It saves fuel by cutting the engine when you don’t need it, like when you’re idling or stopped in heavy traffic. The moment you’re ready to move again, the engine restarts in a fraction of a second. For everyday driving, Auto Stop Start technology is standard on Forester 2.0L, 2.5L and 2.5i-S variants.

Intelligently driven

Subaru Intelligent Drive

Heading to the shops? Taking on the Great Ocean Road? Each situation deserves a distinctive driving mode, so we crafted Subaru Intelligent Drive (SI-Drive) technology, intelligently driven for you. EyeSight® Driver Assist is like your second pair of eyes, spotting potentially dangerous situations. If EyeSight® detects anything that might be of danger, it warns you audibly, urging you to take action and brake.

Get smart

X-Mode

When the going gets tough, engage Forester’s intelligent X-Mode, standard on all Lineartronic™ CVT variants. Featuring Hill Descent Control and improved grip and traction in low speed and slippery conditions, the X-Mode delivers uncompromising performance in challenging terrain.
